

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country voyage in their RV. Newly retired, after spending several years working with his brother to build their crane business into a market leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road expedition.

Whilst on their journey, John spent time conversing with previous business associates whom the Groves stopped to visit along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John discovered a considerable marketplace for a product that could promptly and securely lift people in the air to accomplish maintenance and other building functions.

After their return from vacation, John set up a partnership with two of his friends and bought a metal fabricating company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design elements of that original lift into existing versions.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fateful cross-country journey and since the first JLG aerial platform entered the marketplace. As of today, the business has extended itself into several international marketplaces and continues to develop new machinery to ensure that clients are able to become safer and more resourceful within their workplace.
